represents Biden's Administration policies. I feel like Toto who pulls back the curtain and exposes the fraud.

The Biden Administration has continued the Obama's soft on Iran policies with the delivery of pallets of cash that made the U.S. the greatest funder of terrorism. The Biden Administration has looked the other way when it came to Iranians having the money from oil exports despite the U.S. embargo. They also made, and are continuing to make, direct payments to the Palestinians. This means that Iran's proxies Hamas and Hezbollah get the money to strike Israel. The *Wall Street Journal* has detailed the Iranian involvement in the barbarous October 7, 2023 attack, but the Biden Administration still has not acknowledged Iran's role in it. Remember this when you vote in 2024!

Woodmere, NY

Dear Editor,

The Torah and Chazal tell us that Moshe could not see G-d's face, only His back. What was G-d wearing on the back? Tefillin. What's the meaning of this? The Chasam Sofer explains that we can't understand G-d's actions in real time, only when we look back will we understand G-d's ways. Though there's no "why," there is "what." What must now be done to react to the current situation? For this, we can look towards the tefillin.

The Gemara explains that in G-d's tefillin is the verse, "Who is like my nation Israel..." In our tefillin is the parsha of Shema, representative of *kabbalat ol malachut Shamayim*. We say, "Hear Israel, Hashem Elokeinu Hashem Echad." If we adopt the depth of this verse, it's saying, Hashem that is Elokeinu, of justice, and Hashem of mercy, is one. We accept that G-d is perfect and to make G-d one in this world we must consecrate our leather straps of tefillin, representative of absolute physicality, to G-d. Every desire,

thought and action must be transformed towards serving G-d and then G-d will pronounce, "Who is like my nation Israel..." and initiate redemption.

Steven Genack

Dear Editor,

In April 1945, World War II Supreme Allied Commander Dwight E. Eisenhower was shocked at the Nazi brutality he witnessed at the Nazi Ohrdruf concentration camp. He was afraid that future generations might not believe that the horrors of the Holocaust were real. To preserve history for future generations, he had the media record the scene. He also had American soldiers along with Germans who lived in the adjacent communities view the atrocities for themselves. Hamas recorded their barbaric acts of death and bodily mutilation against babies, children, adults, seniors and Israel soldiers on cell phones and video for all to see. There is no question about atrocities committed by Hamas as they were proud to document their evil work.

Sincerely,
Larry Penner
Great Neck, NY

Dear Editor,

The horrific slaughter of our people is shocking, to say the least. But after the massacre, there are people whitewashing the events, asserting that Israel is to blame for the 1,400 citizens who were murdered by Hamas militants. We wonder: are these people sane? But the answer is that these people are evil. They side with evil; they support evil; they partner with evil.

No clearer is that definition than now, when the burnt bodies of our fellow Jews have not yet been identified or buried.

We must speak up against evil. We cannot sit by and remain silent! We must speak up online and in the media against the evil in this world.

Ruti Lerman
